## CAREER OBJECTIVE

Passionate about technology and always eager to apply my knowledge and experience to solve real-world challenges. A self-educated programmer and quick learner with strong analytical skills. Dedicated to teamwork, cooperation, and continuous improvement.

## SKILLS

- Programming Languages: C, C++, JavaScript, and PHP.
- Frameworks/Libraries: Laravel, jQuery, Tailwind CSS, Bootstrap, React.js, and a basic understanding of Node.js & Express.js.
- Have good knowledge of WordPress CMS.
- Basic knowledge of Git, GitHub, and Docker.

## RECENT PROJECTS

- ❖ **Event Management Web App** – A full-featured web application to manage events, bookings, and users.

**Tech Stack:** Laravel 11, MySQL, Bootstrap 5, jQuery, Breeze, Spatie.

**Key Features:**

- ★ Built an admin dashboard with CRUD operations for events and users.
- ★ Implemented user authentication and role-based access using Laravel Breeze & Laravel Permission.
- ★ Integrated AJAX for smooth front-end interactions without reloading the page.
- ★ Added email notifications for new event registrations.

**Github:** [https://github.com/hasiboctane/project\\_2k25\\_two](https://github.com/hasiboctane/project_2k25_two)

- ❖ **Laravel Ecommerce** – A custom-built online store with product management, cart, and checkout functionalities.

**Tech Stack:** Laravel, MySQL, Tailwind CSS, Alpine JS, Livewire, Filament.

**Key Features:**

- ★ Built user authentication system with login and registration.
- ★ Developed dynamic product listing, search, and category filtering.
- ★ Implemented shopping cart, checkout process, and order management.
- ★ Admin panel for managing products, orders, and users.
